

RESEARCH ON VIRTUAL REALITY TOOLS AND WATER WAVE SIMULATION APPLICATION

nan

Abstract: Virtual reality technology is a term that first emerged around the 1990s, but has truly developed strongly in the past few years. Worldwide, virtual reality technology has become a cutting-edge technology due to its wide range of applications in various fields (research and industry, education and training, tourism, real estate services, commerce and entertainment, etc.) and its economic potential as well as its usefulness.

Keywords: WATER WAVE SIMULATION TOOLS, VIRTUAL REALITY, APPLICATIONS
