

RESEARCH ON MOTION EFFECTS IN FLASH, APPLICATION IN DESIGNING SIMULATIONS FOR SOME PHYSICS EXPERIMENTS

nan

Abstract: Currently, our country is accelerating the process of industrialization and modernization, expanding international cooperation relations to integrate with the global socio-economy, aiming to achieve outstanding development for the goal of comprehensively improving people's lives and enhancing the nation's position on the international stage. To achieve this, it is essential to enhance the capacity of human resources in all aspects. Therefore, the task set for the Education sector is to train a new generation of workers who can meet the increasingly high demands of the renewal period.

Keywords: MOTION EFFECT, FLASH, APPLICATION DESIGN SIMULATING SOME PHYSICS EXPERIMENTS
