

RESEARCH ON OPENNLP OPEN SOURCE IN VIETNAMESE LANGUAGE PROCESSING

nan

Abstract: Today, with the explosive development of information technology, software and applications of information technology in daily life have also evolved accordingly. Despite such a booming growth of information technology services, the field of natural language processing for Vietnamese has developed slowly, with the number of researchers in this area being very limited. Yet this field is extremely important and presents many difficulties and challenges for information technology professionals.

Keywords: OPENNLP OPEN SOURCE, VIETNAMESE PROCESSING, OPENNLP
