

RESEARCH ON EDI ELECTRONIC DATA INTERCHANGE MODEL BASED ON EBXML STANDARD FOR ENTERPRISES

nan

Abstract: Currently, information technology in general and e-commerce in particular have been developing worldwide. Therefore, the trend of applying e-commerce is also growing rapidly, bringing significant progress to the economic development of each enterprise and country. Based on the application of new e-commerce techniques, many large organizations and enterprises in developed countries (such as the US, Canada, Japan, South Korea...), with the support of their governments, have been rapidly promoting the construction and dissemination of solutions, integration processes, and standardization of business documents.

Keywords: EDI DATA EXCHANGE MODEL BASED ON EBXML STANDARD, ENTERPRISES, EDI, EBXML
