

RESEARCH ON SOME SECURITY TECHNICAL SOLUTIONS IN WLAN WIRELESS NETWORKS

nan

Abstract: Today, science and technology, especially information technology and telecommunications, have developed extremely strongly. The achievements they have brought have been widely applied in our daily lives. High-tech devices such as laptops, pocket computers, mobile phones... are no longer unfamiliar and have become an indispensable part of modern life. Along with the telecommunications network system, these devices have connected people all over the world together.

Keywords: SOME TECHNICAL SECURITY SOLUTIONS, WIRELESS NETWORK WLAN, WLAN
