

RESEARCH AND DEVELOPMENT OF MOBILE APPLICATIONS AND BUILDING A BRICK-STACKING GAME

nan

Abstract: In modern life today, when everything is racing against time, the mobile phone has become a useful and indispensable device for people. Therefore, the global mobile device manufacturing industry is developing very strongly. Mobile devices are becoming more modern, smarter, and have more outstanding features; they are not only responsible for conversation functions but also for many other functions such as taking photos, listening to music, watching movies, etc. Hence, the demand for software development for mobile devices is increasing, especially the strong growth of the mobile gaming world, leading to a series of game genres being created to meet this demand.

Keywords: DEVELOPING APPLICATIONS ON MOBILE DEVICES, BUILDING A BRICK-STACKING GAME
