

RESEARCH ON DEVELOPING MOBILE DEVICE APPLICATIONS ON J2ME AND BUILDING A TANK SHOOTING GAME

nan

Abstract: Mobile phone networks appeared in Vietnam in the early 1990s, and over time, the number of subscribers and mobile service providers in Vietnam has steadily increased. Today, mobile phones are no longer just for making calls or sending text messages but also serve as convenient devices for entertainment and information retrieval. Therefore, developing applications for mobile phones has become an inevitable requirement in the current trend.
