

RESEARCH AND DEVELOPMENT OF A SIMULATION PROGRAM FOR THE IMS SUBSYSTEM IN THE NGN NETWORK ARCHITECTURE

nan

Abstract: Along with the development of society, the demand for information is becoming increasingly urgent for human life. Currently and in the coming time, the need to develop voice, non-voice, Internet, and especially broadband service types is growing and inseparable from social life. To meet that demand, the telecommunications network requires a modern, flexible structure and, above all, must satisfy all multimedia service needs.

Keywords: BUILDING A SIMULATION PROGRAM FOR THE IMS SUBSYSTEM, NGN NETWORK ARCHITECTURE, IMS, NGN
