

RESEARCH ON ROUTING PROBLEMS IN WIRELESS SENSOR NETWORKS AND SIMULATION ON NETWO SOFTWARE

nan

Abstract: In recent years, thanks to the achievements of science and technology in general and the field of wireless communications in particular, the remarkable development of networks such as low-cost, low-power, and multifunctional sensors has received significant attention. Consequently, sensor networks are being focused on deployment for application in daily life as well as in many other fields (healthcare, business, etc.). However, they are facing a series of challenges.

Keywords: ROUTING PROBLEM, WIRELESS SENSOR NETWORK, SIMULATION ON NETWO SOFTWARE
