

RESEARCH AND DEPLOYMENT OF VPN WITH IPV6 SUPPORT ON CISCO DEVICES

nan

Abstract: In today's era, when information plays an extremely important role in human development, the need for exchanging and updating information is increasingly essential. Therefore, businesses, companies, and corporations must make greater efforts in communicating and exchanging information with each other, accompanied by the growing trend of expanding investments and opening more branches everywhere. However, the issue of communication between employees at remote branches and the headquarters poses a difficult problem for businesses, companies, and corporations... To solve this problem, the Internet is designed to connect multiple different networks and allow information to be transmitted to users.

Keywords: DEPLOY VPN WITH IPV6 SUPPORT ON CISCO DEVICES, VPN, IPV6
