

EXPLORING J2ME TECHNOLOGY AND ITS APPLICATION IN BUILDING A TETRIS GAME ON MOBILE DEVICES

nan

Abstract: The increasing number of mobile devices in Vietnam has led many people to consider mobile phones as an indispensable part of daily life. Along with the rise in users, the features available for phones have also increased correspondingly. A range of advanced features has been introduced, such as digital photography, music playback, and most notably, the ability to use programs not provided by the phone manufacturer.

Keywords: ABOUT J2ME TECHNOLOGY, APPLICATION FOR BUILDING TETRIS BLOCK-STACKING GAME ON MOBILE DEVICES, J2ME, GAME
