

BUILDING AN SMS MESSAGING PROGRAM OVER THE INTERNET

nan

Abstract: In recent years, the need for information exchange has become indispensable in everyone's daily life. This exchange can be carried out in various ways, among which information exchange via mobile phones is increasingly popular and holds the most important position. For the method of information exchange via mobile phones, SMS exchange also accounts for a large portion. Most current mobile network providers offer a free service for their own network, which is a free messaging service using the internet.

Keywords: SMS MESSAGING PROGRAM OVER THE INTERNET, SMS, INTERNET
