

BUILDING A MOTORCYCLE REGISTRATION RECORD MANAGEMENT PROGRAM

nan

Abstract: Today, with the continuous and strong development of information technology in all professions and various fields of society such as economy, national defense and security, e-commerce... Information technology is becoming an essential need for businesses, economic organizations, and social organizations. Many software application programs in daily life have emerged, such as personnel management, payroll management, sales management, and inventory management programs, which have become effective tools replacing traditional and manual management tasks.

Keywords: MOTORCYCLE REGISTRATION MANAGEMENT PROGRAM
