

BUILDING A MULTIPLE-CHOICE TEST PROGRAM FOR VIET – DUC VINH PHUC VOCATIONAL COLLEGE

nan

Abstract: In recent years, the development of information technology has been changing the entire world. All professions and fields such as economics, culture, medicine, industry, etc., are gradually being computerized, making work easier, faster, and more accurate. Particularly in education, computerization contributes to improving the quality of teaching and learning. Among these, computerizing examination work is an important and urgent issue to ensure quality, objectivity, and accuracy.

Keywords: MULTIPLE CHOICE TEST PROGRAM, VIET – DUC VOCATIONAL COLLEGE VINH PHUC
