

BUILDING A DATABASE DISASTER PREVENTION SOLUTION WITH ORACLE DATA GUARD

nan

Abstract: Database is one of the most prominent fields in information technology. Since the first database model emerged in the 1960s, although it is not a long journey compared to other scientific disciplines, it is a significant period for computer science, especially for databases. Databases have gone through many generations of database management systems and have been widely applied in science and various sectors of the national economy.

Keywords: DATABASE DISASTER PREVENTION SOLUTION, ORACLE DATA GUARD, ORACLE, DATA
