

BUILDING A MULTIMEDIA DATA TRANSMISSION SYSTEM OVER NETWORK ENVIRONMENT

nan

Abstract: In recent years, computer networks have become increasingly popular. Connecting computers in a network environment as well as linking networks together brings us many benefits in work, study, research, and entertainment. We can use shared available resources such as file servers, printers, fax machines, etc. The network environment is also a fast and convenient information environment thanks to network communication mechanisms such as:

Keywords: MULTIMEDIA DATA TRANSMISSION SYSTEM OVER NETWORK ENVIRONMENT, MULTIMEDIA
