

BUILDING A STUDENT INFORMATION STORAGE SYSTEM FOR THE UNIVERSITY OF INFORMATION AND COMMUNICATION TECHNOLOGY

nan

Abstract: We live in an era of information explosion, with hundreds of thousands of pieces of information passing by each day, and we only know the information we need, sometimes even unaware of what is essential for us. The information storage and sharing system is a very important part of today's information management systems. From this arises the requirement for the information technology and communication industry to create a widespread information sharing environment that achieves the largest, fastest, and most accurate amount of information to serve the process of research, statistics, and reporting in units such as schools, human resource management agencies, and hospitals.

Keywords: INFORMATION STORAGE SYSTEM FOR STUDENTS OF THE UNIVERSITY OF INFORMATION TECHNOLOGY, COMMUNICATION, AND BIOLOGY
