

BUILDING AN ENTRY AND EXIT DETECTION SYSTEM

nan

Abstract: With the strong development of science and technology in recent decades, the information technology industry has created an important turning point in meeting human needs. Today, applications of information technology have become closer and more familiar to people, and perhaps it is an essential part of life. With the advancement of science and technology and the increasing demands of people's lives, products must become more advanced to meet those needs.

Keywords: IN/OUT DETECTION SYSTEM
