

BUILDING A PROXY CLUSTER SYSTEM WITH USER AUTHENTICATION USING LDAP DIRECTORY

nan

Abstract: Along with the development of the world and the trend of international economic integration, our country is gradually renewing itself and entering a period of industrialization and modernization, simultaneously building material and technical foundations while developing the national economy. Along with the strong development of information technology worldwide, information technology in our country is also becoming increasingly widespread and popular. The use of the internet for work in agencies and organizations, as well as for research and study at universities across the country, is no longer a rare occurrence.

Keywords: CLUSTER PROXY SYSTEM WITH USER AUTHENTICATION USING LDAP DIRECTORY, PROXY, LDAP
