

BUILDING A TOURIST ATTRACTION SEARCH SYSTEM IN THAI NGUYEN PROVINCE USING DIGITAL MAPS

nan

Abstract: The rapid development of information technology has enabled informatics to penetrate deeply into scientific fields. Today, almost all engineering and scientific disciplines apply information technology. The term Geographic Information System (GIS) is no longer unfamiliar to those working in applied informatics who use information technology to build GIS systems. With its outstanding features, GIS has truly become an important element in the IT system and is indispensable in several areas of modern social life:

Keywords: TOURIST LOCATION SEARCH SYSTEM IN THAI NGUYEN PROVINCE USING DIGITAL MAP, SEARCH
