

BUILDING A MOBILE APPLICATION SOFTWARE ENGLISH FOR YOU E4U VER 1

nan

Abstract: With the current development of information technology, mobile devices have become an indispensable assistant for the majority of people. As technology advances, mobile devices, although limited compared to computers, still have their own advantages. Mobile commerce is a new concept built on the foundation of internet-connected mobile devices. JAVA is the most successful choice for this field.

Keywords: APPLICATION SOFTWARE, MOBILE ENGLISH FOR YOU E4U VER 1, ENGLISH, FOR
