

BUILDING AN ENGLISH-VIETNAMESE DICTIONARY ON MOBILE PHONES

nan

Abstract: In recent years, with the outstanding development of science and technology, especially information and communication technology, the applications of information and communication technology in various fields have made significant contributions to human and social development. Among these fields, applying information and communication technology to build mobile applications is essential, as mobile devices are now very common, with the number of mobile devices increasing daily in Vietnam. Many people consider mobile phones an indispensable part of their daily lives.

Keywords: ENGLISH – VIETNAMESE DICTIONARY ON MOBILE PHONES
