

BUILDING A MUSIC PLAYER APPLICATION ON MOBILE PHONES USING J2ME LANGUAGE

nan

Abstract: Mobile phone networks appeared in Vietnam in the early 1990s, and over time, the number of subscribers as well as mobile service providers in Vietnam has increasingly grown. Along with the development of mobile subscriber numbers is the diversification of services aimed at mobile devices. Today, mobile phones are not only used for making calls or sending regular text messages but also serve as very convenient devices for entertainment and information retrieval.
