

BUILDING A CONTACT MANAGEMENT APPLICATION ON THE ANDROID OPERATING SYSTEM

nan

Abstract: Mobile device technology has matured rapidly in a very short period of time, especially in mobile phones. Phones are becoming increasingly smarter, with lower costs, attractive designs, and are also equipped with powerful operating systems. Some operating systems that hold a large market share in the mobile phone world include Symbian, Apple, Mobile Windows, RIM, etc. These operating systems have powerful features and provide a good environment for developing applications for handheld devices.

Keywords: CONTACT MANAGEMENT APPLICATION ON ANDROID OPERATING SYSTEM, DANH, ANDROID
