

Build a YOLO clothing sales website

Hoang Ngoc Khoi

Abstract: This topic focuses on building an e-commerce web system specializing in Yolo clothing, meeting the online shopping needs of consumers. Through market research and analysis of current trends in the e-commerce field, the main goal is to create a user-friendly interface along with effective product management functions for businesses. The approach includes combining theoretical research on web design with practical system implementation. The website is expected to provide solutions that optimize the online shopping experience and enhance the competitiveness of Yolo clothing brands.

Keywords: Yolo Clothing e-commerce website, Web design, Product management
