

Build a website selling Iphone phones

Nong Van Do

Abstract: In the context of the increasingly developing online business environment, building a website specializing in selling iPhone phones is necessary to take advantage of the vast market. The objective of this project is to develop an e-commerce system with the ability to manage products, display detailed information, and support convenient buying and selling transactions for customers. The research method combines analyzing market needs with application design and deployment. The expected result will provide an effective technical solution, contributing to the development of the e-commerce technology industry.
