

Build website: Words Comic for TruyenOnline store in Tuyen Quang

Leo Van Tuan

Abstract: In the increasingly growing context of reading comics online, this topic focuses on building a web system called 'Words Comic' to provide a digital solution for the Online Comic Store in Tuyen Quang. The main goal is to create a convenient and diverse reader experience through the development of an attractive user interface, content database, and easy-to-use management system. The research methodology includes market needs analysis, design, and implementation of the web application. It is expected that this project will bring value to the local online comic industry by optimizing the process of accessing comic content.
