

Build a sports shoe sales website for T&T; Shoes shop.

Dang Dinh Viet Long

Abstract: In the fiercely competitive e-commerce market, this project aims to build a professional web system to support T&T; Shoes shop in business development. The research method combines theory and experimentation, based on modern website design principles and advanced technology. Through this, the project expects to provide an optimal solution for online sales, enhance user experience, and improve the business efficiency of T&T; Shoes shop.
