

DEVELOPMENT OF THE "BÁCH HÓA SINH VIÊN" APPLICATION FOR MOBILE DEVICES

Triệu Văn Dương

Abstract: In the context of the increasingly developing digital landscape, managing students' personal and financial information is becoming urgent. This topic focuses on developing a mobile application named 'Bách Hóa Sinh Viên' to effectively address the management of tuition fees, meal expenses, accommodation, and online shopping services for students. The research method combines user needs analysis and mobile application system design. Through practical implementation, the topic is expected to bring significant utility in supporting students' personal financial management, thereby improving their quality of life and allowing them to focus more on their studies.
