

Building an online Chinese learning and testing system for the Tuấn Kiệt Chinese Language Center.

Ha Hanh Hang

Abstract: In the context of globalization, the demand for Chinese communication is increasing at Tuan Kiet Language Center. This topic focuses on building an online learning and testing system to improve educational quality and student learning efficiency. Through theoretical and experimental research, the topic aims to provide a multimedia learning support tool combined with Chinese proficiency assessment tests. The system's goal is to create a flexible learning environment, promote students' self-study ability, and contribute to improving teaching methods at the center.

Keywords: Online system, learning Chinese, assessment test
