

Design and deploy a LAN network system for HRM Hoàn Cầu Company.

Trịnh Thị Hiền

Abstract: This topic focuses on designing and implementing an efficient Local Area Network (LAN) system for HRM Hoàn Cầu Company. The context for proposing this solution is the rapid development of information technology in the workplace, which requires improved internal communication as well as data security assurance. The main objective of the project is to build a robust LAN system to enhance operational performance and information security. The research methodology includes assessing the current status, theoretical network design, and practical deployment within the company environment. The expected outcomes of this topic not only provide a suitable technical solution but also contribute to the technological infrastructure development of HRM Hoàn Cầu Company.
