

Developing a personal expense management application on the Mobile platform.

Nguyen Quy Kien

Abstract: In today's digital age, personal financial management is becoming increasingly important. This topic focuses on developing a personal expense management application on a mobile platform with the goal of helping users easily track and analyze their spending. Through theoretical research combined with experimentation, the topic will build a system that provides effective solutions to improve financial management. The project not only aims to serve the community but also contributes to the field of information technology in supporting expense management.

Keywords: Financial management, Mobile Application, Personal spending, Information technology, Empirical research
