

Build a medical appointment booking website for a private clinic.

Tran Manh Linh

Abstract: In the context of an increasing number of people using online medical services, this topic aims to address the issue of effectively managing appointment schedules at private clinics. The objective of the research is to build a web system for patients to register for appointments, enhancing flexibility and saving time for both patients and doctors. The research method combines theoretical knowledge of time management in the medical field with the practical implementation of a web application. The expected result is an efficient system that can be widely applied, helping to improve medical services and enhance the patient experience.
