

Building a production management and output tracking system for Luong Thinh Industrial Company Limited.

Nguyen Thi Nga

Abstract: In the practical operations of enterprises, production management and output tracking are decisive factors for business efficiency. This thesis aims to build an automated production management system for Luong Thinh Industrial Co., Ltd. through a combined approach of theoretical research and experimentation. The system is expected to enhance labor productivity, optimize processes, and reduce production costs. Thereby, the thesis hopes to make a significant contribution to the application of industrial production management.

Keywords: Production management system, output tracking, Luong Thinh Industrial Company Limited, business efficiency, process optimization
