

Developing the Hoang Yen - Thai Nguyen hotel management application

Hoang Thanh Nghia

Abstract: In the context of increasingly complex hotel management needs in the Thai Nguyen region, this topic focuses on developing a hotel management application system for Hoang Yen Hotel. The objective of the research is to build an integrated technological solution to optimize the booking process and hotel operations. By combining theoretical research methods with experimentation, this topic expects to provide an effective management system that enhances service quality and increases labor productivity. The expected results will contribute significantly to improving local hotel management.
