

Building a medical examination and treatment management website for Yen Thuy Medical Center.

Bui Duc Ngoc

Abstract: In the context of the increasing demand for improving the quality of medical services, this topic focuses on building an online medical examination and treatment management system to meet the requirements of Yen Thuy Medical Center. Through research and experimental deployment, the project will propose optimal technical solutions to enhance operational efficiency in the healthcare sector. The approach includes needs analysis, user interface design, and web application development. The results of the project not only contribute to technological advancement at Yen Thuy Medical Center but also demonstrate the potential for widespread application in other healthcare facilities.

Keywords: Online medical management and treatment website, medical center, web application development, service improvement
