

Building an internal recruitment management system integrated with an AI Chatbot to support CV screening for UTI VINA Company.

To Chi Toan

Abstract: In the context of information technology development and increasingly complex recruitment management needs, this topic focuses on building an internal recruitment management system integrated with an AI Chatbot. The objective is to solve the problem of efficient and fast CV screening to reduce the workload for the human resources department. The research method combines both AI theory and practical application deployment. The expected results will bring high practical value, improve the recruitment process, and enhance work productivity.

Keywords: AI Chatbot, internal recruitment management, CV screening, UTI VINA Company, HR support system
