

Build the "LichHocSV" application to support schedule management and utilities for students.

Duong Viet Vuong

Abstract: In the context of education increasingly demanding efficiency in organizing and managing time, this topic focuses on building the 'LichHocSV' application, aiming to solve the problem of managing students' class schedules. Through theoretical research combined with experimentation, the topic proposes an intelligent solution to support students in tracking and planning their daily learning activities. The expected results of the topic not only improve individual productivity but also contribute to enhancing the quality of education by providing a useful tool to help students manage their time more effectively.
