

Build a mobile phone sales website

Ha The Anh

Abstract: In the context of the rapidly growing online business environment, this topic focuses on building a professional website for selling phones. The objective of the research is to design and implement a website system that meets customers' convenient shopping needs and optimizes the business process for sellers. The research method combines web design theory with experimentation to build a user-friendly interface that is effective in product management. The topic is expected to bring practical value by providing technical solutions for mobile phone businesses, while also contributing to the field of e-commerce research.

Keywords: E-commerce website, mobile phone, web design, e-commerce, product management
