

Build a website selling computer electronic components for NVTcomputer store.

Nguyen Xuan Ngoc

Abstract: This topic aims to solve the problem of managing and selling electronic components efficiently by building a specialized website system for the NVTcomputer store. In the context of the rapid development of e-commerce, this system is expected to enhance customer experience while optimizing operational and product management processes. The research method combines a practical survey at NVTcomputer with an analysis of similar business models in the information technology industry. The project expects to make important contributions to the application of technology to improve the store's operational efficiency, while providing a foundation for sustainable development in the retail sector of computer components.

Keywords: NVTcomputer retail website, computer electronics, business management, e-commerce
