

Building a cross-platform online chat application HiChat using Flutter Framework

Hoang Trieu Ngu

Abstract: In the modern context, possessing an effective information system is an urgent need. This topic focuses on building a cross-platform online chat application, HiChat, aimed at meeting the demand for fast and convenient communication for users on various devices. Through theoretical research combined with experimentation, the topic applies Flutter Framework technology to ensure optimal performance and cross-platform compatibility. It is expected that HiChat will make a significant contribution to the development of cross-platform information systems, creating value not only for developers but also for end users.

Keywords: Flutter Framework, online chat application, cross-platform
