

Build a furniture sales website for Vinh Phuc store using Laravel Framework.

Tran Van Khanh

Abstract: Research and implement the construction of an online sales web system dedicated to the Vinh Phuc furniture store, aiming to meet diverse and more effective business needs. The topic combines theoretical research methods with experimentation to develop a user-friendly interface and effective administrative functions based on the Laravel Framework. The goal is to create a high-quality digital solution, optimize the buying and selling process, and enhance the store's competitiveness in the online market.

Keywords: Furniture sales website, Laravel Framework, Vinh Phuc Store, Online business platform, System administration
