

Build a website to promote and order dishes online for the Wind SaPa restaurant.

Hoang Duc Doanh

Abstract: This project aims to build an online website to promote and simplify the process of ordering dishes at Wind SaPa restaurant. By combining theoretical research with experimentation, the project will analyze the needs of modern customers, thereby designing a user-friendly interface and efficient ordering functionality. The expected result is to provide an optimal solution for the restaurant to expand its business and enhance customer experience.
