

Analysis, assessment, and prediction of the impact of Covid on labor and employment in Vietnam.

Dong Jiangnan

Abstract: This topic aims to analyze and evaluate the impact of the COVID-19 pandemic on the labor market and employment in Vietnam. The main objective is to identify the most profound changes in occupations, scale, and job quality caused by the fluctuations of the pandemic. The approach combines theoretical and empirical research through data analysis from reliable sources to predict future trends. The expected results contribute to building a sustainable development strategy for Vietnam's labor economy.
