

Building a B1 English exam preparation website

Ngoc Van Giang

Abstract: This topic focuses on building a specialized website to support learners in practicing B1 English skills. The context for choosing this topic stems from the increasing demand of people wanting to improve their foreign language proficiency. The project's objective is to design and deploy an effective web system that provides diverse learning content, aligned with the B1 output standards set by the Ministry of Education and Training of Vietnam. The research methodology includes integrating theoretical knowledge of linguistics and web technology with practical application development. The expected result is to provide a high-quality online learning platform, contributing to the development of the community's foreign language competence.

Keywords: Practice website, English B1, Web technology, Learning platform, Language knowledge
