

Build a sales website for Huy Phu Kien store.

Nguyen Van Huy

Abstract: In the context of the increasingly growing online business environment, this topic focuses on building a professional sales website for Huy phụ kiện store. The objective of the research is to create an easy-to-use and customer-friendly interface while optimizing the product and order management process from the store owner's side. The approach includes studying the theory of e-commerce website design, analyzing business requirements, and then implementing a practical application on modern platforms such as React.js and Node.js. The expected results will bring significant benefits to both customers and store owners through a convenient shopping experience and efficient business management.

Keywords: E-commerce website, React.js technology, Product management
