

Build the Alohan website on the Shopify platform.

Le Thanh Tung

Abstract: In the context of the increasingly growing online business environment, building a professional website has become a mandatory requirement for businesses. This topic focuses on the process of designing and deploying the Alohan website on the Shopify platform to meet the diverse needs of customers. Through theoretical research on user interface (UI) and user experience (UX), the topic applies modern design principles to create a user-friendly and easy-to-use website. Through the actual deployment process, the project contributes to providing effective solutions for businesses in building and maintaining e-commerce websites. The results of the topic not only reflect academic knowledge of website design but also bring significant business benefits.
