

Build an online movie watching website

Tran Hoang Huy

Abstract: In the context of information technology development, the necessity of an online platform for high-quality movie streaming is increasingly emphasized. This topic focuses on building a website dedicated to online movie streaming services, with the goal of creating an advanced technical solution to meet users' entertainment and learning needs. Through a combination of theoretical research and experimentation, the topic will deploy modern technologies such as web programming, user interface/user experience (UI/UX) design, information security, and big data analysis to build the system. The expected outcome of this topic is not only a complete technical product but also a contribution to the development of the multimedia technology industry.

Keywords: Online movie streaming website, Information Technology, Web Programming, UI/UX, Information Security
