

Study of the operation, maintenance, and troubleshooting procedures for the Nihon Kohden TEC-8300 defibrillator.

Pham Quang Vinh

Abstract: This topic focuses on researching the operation, maintenance, and troubleshooting procedures for the Nihon Kohden TEC-8300 defibrillator in clinical practice. Through an analysis of the current situation, the topic aims to optimize device performance while ensuring treatment safety. The research methods combine theory and experimentation to provide comprehensive solutions for common technical issues. Expected results will significantly contribute to improving the quality of medical services and creating an effective operational management system.

Keywords: defibrillator, Nihon Kohden TEC-8300, maintenance, troubleshooting, experiment
