

Design of an automatic windshield wiper and washer system model for the 2017 Honda Civic.

Nguyen Duc Khanh

Abstract: This topic aims to research and design an automatic windshield wiper and washer system for the Honda Civic 2017, meeting the needs for safety and convenience while driving. By combining theoretical research with experimentation, the project will propose effective technical solutions to improve driver visibility in adverse weather conditions. The expected outcome is a suitable, easy-to-implement system capable of enhancing driving safety.
